Web Conference on Demand enabling real-time collaboration

it's just like being there

An audio conference with visuals...think of the possibilities for enhanced collaboration. TELUS brings this experience to your office with Web Conference on Demand. This solution integrates audio conferencing with a reliable, easy-to-use and feature-rich Web conferencing service – all at a reasonable cost.

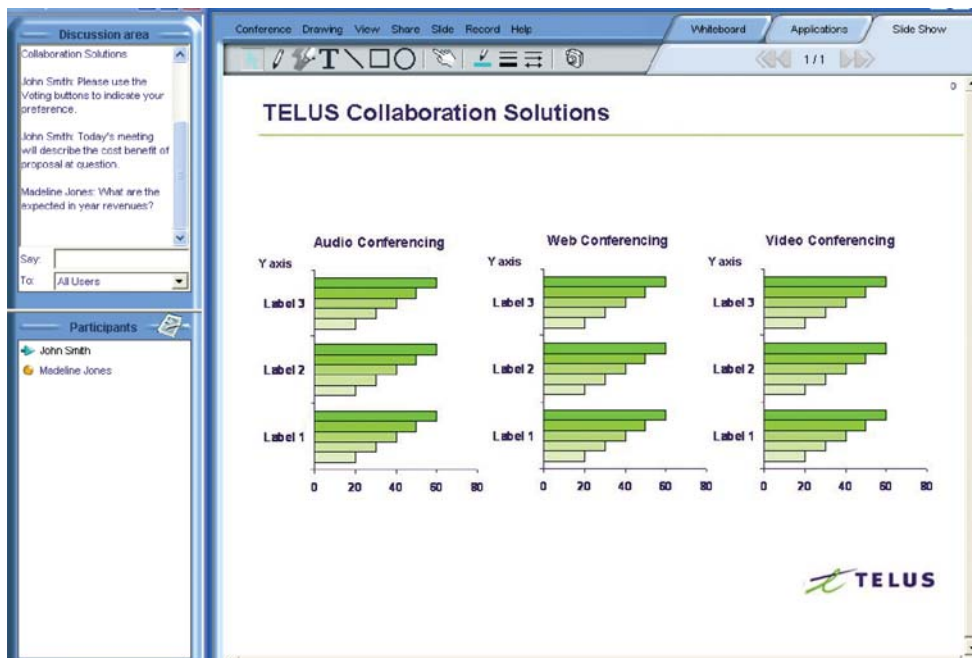

With TELUS Web Conference on Demand, your dispersed teams can work together collaboratively and productively. Our solution takes a comprehensive suite of Web conferencing tools and fully integrates them with the unsurpassed quality of TELUS Audio Conferencing. Teams can share and annotate documents, make presentations with visual aids, and whiteboard ideas. Computer desktops can be shared with others. For participants who are unable to attend, you can record the session – integrated with audio – for future playback.

TELUS Web Conference on Demand is part of our Collaboration portfolio – products and services that drive active and real-time collaboration, putting the right information in front of the right people at the right time. Our solutions are designed to help you work and collaborate more effectively, both within your company and externally with customers, suppliers and partners.

face-to-face meetings without the expense

Web Conference on Demand provides your teams with the tools they need for real-time collaboration. See what you can do:

- Share applications
- Share your desktop with others
- Send a chat message to one person or to the whole group
- Do a Web tour
- Present a slide show
- Record presentations for future playback

Web Conference on Demand

comprehensive features

TELUS Web Conference on Demand provides you with robust and feature-rich collaborative tools:

- Application viewing and sharing
- Permission-based sharing allows users to share their entire desktop or specific applications
- Slide show presentation
- Annotation tools
- White boarding
- Chat – public or private
- Moderator control delegation
- Integrated Web and audio conference management control
- Selectable resolution to accommodate any connection speed
- Integrated audio and Web conference recording
- Playback to view and hear recorded Web conferences

easy to use

Your meeting participants can access meetings conveniently via a PC and a standard Web browser. Meeting notification and login is straightforward. All you require is a single set of login information to access both the audio and Web portions of the conference.

highly secure

Web Conference on Demand utilizes secure socket layer technology (SSL) to ensure the safety and security of your Web conferences. All participants must log in with a unique code. During meetings, moderators can remove participants with the click of a mouse.

cost-effective

TELUS Web Conference on Demand is the most cost-effective Web conferencing product on the market. We offer two pricing options:

- **Pay as you go.** This per-minute usage model is designed for companies that have an intermittent need for Web conferencing. Prices are similar to TELUS Audio Conferencing per minute rates.
- **Unlimited usage.** This is the most cost-effective model for companies that have a greater need for Web conferencing. Contracts are sold per user seat license at under \$50/month, depending on the number of seats purchased.

With TELUS Web Conference on Demand,
it's just like being there.
