TELUS iRoom environment interactive environments foster collaboration

maximize your meeting experience

When a leading Canadian university decided to expand its executive MBA program, it established real-time interactive videoconferencing classrooms in major cities across Canada. The new facilities enhanced the distance learning experience and served to significantly increase enrolment. The program is now the top-ranked executive MBA program in Canada.

When new administrative headquarters were being designed for a local government, having state-of-the-art audiovisual equipment was a high priority. The council chambers included electronic voting, streaming of proceedings and easy-to-use controls. As a result, the council has been able to increase productivity, lower costs and improve services.

When a leading retail bank was developing new office space, a highly interactive, intelligent boardroom was included in the design. The room is easy to operate and never fails to impress meeting participants. It has enhanced collaboration efforts and increased productivity.

These are just a few examples of Canadian organizations that have incorporated TELUS iRoom (intelligent room) environments into their operations. They chose TELUS to help them transform a physical space into an iRoom environment – a room that encourages and enables better collaboration, more creative thinking, quicker decision making and increased productivity.

Whether your space is a boardroom, council chamber or amphitheatre, TELUS can integrate the latest audiovisual and communication equipment to maximize your communication experience. TELUS is the Canadian leader in implementing integrated solutions for intelligent rooms. Our iRoom Environment solutions comprise a complete suite of conferencing technology – integrated audio, Web, video, and streaming/Web casting. We provide the very best in audiovisual equipment through our national certification with leading vendors such as Polycom, Tandberg, Barco and Polyvision. Our depth of network expertise in IP, ISDN and video ensures seamless integration with your business operations.

enhance collaboration, increase productivity

A TELUS iRoom Environment is built to enhance collaboration and increase productivity, while at the same time ensure easy operation for all users. TELUS provides a unique solution, specifically designed to meet your requirements. We will work with your company to maximize business benefits:

Enhanced collaboration. Our solution enables participants to collaborate across the country with built-in state-of-the-art video conferencing equipment. It facilitates discussions through interactive whiteboards and allows easy sharing of documents whether they are online or on paper.

Increased productivity. With an iRoom Environment, all the collaboration technology is at your fingertips. There's no set-up time for equipment, devices and tools. And there is no need for a dedicated resource to operate the room – the control panel is designed to meet your room needs and can be easily operated by anyone.

Reduced travel costs. Virtual face-to-face sessions reduce the need for travel. In-house training courses can be delivered without having to bring everyone together.

The very best user experience. Impress clients, partners, suppliers and staff with the best audiovisual equipment available on the market: intelligent sound and light systems, built-in automated plasma display screens, and easy-to-operate touch panel control systems.

Ultimate reliability. With our fully managed iRoom Environment, TELUS takes care of everything – network, engineering and design, equipment, project management and training. Because of our network expertise, TELUS is the only national supplier that can provide a totally integrated solution and seamless implementation.

Top-notch design. TELUS can provide professional engineering design consultants to help you create the environment and functionality that you desire for your room.
