

high speed Internet service for business

leverage the power of the Internet

You've heard the hype about super-fast Internet access. But speed is only part of the story when considering how high speed Internet can benefit your business. It's what you do with the speed that really counts.

- Save time when you send or receive large documents like proposals, multimedia files or spreadsheets with our newly increased ADSL connection traffic limits
- Communicate quickly and easily with employees, contractors, suppliers and customers
- Process IP POS (point-of-sale) transactions – also referred to as Internet-based debit and credit card transactions using your high speed Internet connection.
- Connect multiple computers to a single TELUS high speed Internet for Business plan with our Wireless Office Networking modem and plan.

To gain these advantages, you need a true high speed business service – not a residential connection. TELUS high speed Internet service for business offers faster connections, higher bandwidth and critical features such as hosting and customized email addresses.¹ It is the premier high-performance Internet solution designed specifically for business use.

high speed... high performance

See how TELUS high speed Internet service for business can be your competitive edge. Take advantage of reduced costs, a more productive work environment and the ability to reach customers around the world.

TELUS high speed Internet service for business uses ADSL technology. ADSL (Asymmetric Digital Subscriber Line) operates over the unused bandwidth of regular phone lines. There's no need for an additional line because phone calls, faxes, and IP POS (debit and credit card transactions) get through without interruption. ADSL is your convenient connection: no dialing, no waiting.

FEATURES	OFFICE PLAN	SERVER PLAN	SERVER ELITE PLAN

high speed Internet service for business

the features you need

High-speed Internet is the efficient and cost-effective way to do business online. TELUS high speed Internet service for business can meet your company's requirements for a high-speed Internet connection and deliver the features you need to make the Internet an effective business tool.

- **ADSL Connection Speed** – 3.0 mbps downloading speed, up to 50% faster than TELUS residential plans.
- **ADSL Connection Traffic** – get up to 100 GB of connection traffic (examples of just 1 GB of data transfer is 100 large software programs). TELUS tracks high speed usage to manage and ensure network reliability for all users.
- **Customized Email Addresses** – comes with professional, easy-to-remember email addresses such as yourname@yourbusiness.com.¹
- **Spam Control** – included at no extra cost to help filter annoying and offensive junk email before it reaches your mailbox.³ You control the settings to delete spam altogether or tag it as spam when it appears in your mailbox.
- **Anti-Virus with Ad Block Protection** – included at no extra cost because at TELUS, we want you to feel safe and secure online, all the time.²
- **Business Web Site** – create your a basic Web site using your own domain name like www.yourbusiness.com with our Easysite Creation Wizard, included at no extra cost.
- **Remote Dial-up Access** – for when you or your employees need to connect to the Internet remotely, from home or on the road.
- **Business Priority Technical Support** – expert technical support is available 24/7 from our priority help desk for business customers – your calls are placed at the top of the queue, every time!
- **TELUS QuickConnect™ Kit** – allows you to quickly and conveniently install your TELUS high speed Internet service yourself. It includes a D-Link high speed modem, TELUS Install Wizard CD, and our Easy-to-follow Install Guide.
- **Wireless Office Networking Kit** – connect up to five computers and devices wirelessly. Access files or content stored on your office network, share printers, as well as download information from the Internet all at once through one powerful wireless connection. It includes a 3-in-1 wireless access point, 4 port router, high speed modem, TELUS Install Wizard CD, and Networking Guide.
- **IP Point-of-Sale Capable** – offers faster transaction processing to your customers, you can complete a debit or credit transaction in about 3 seconds. Add multiple POS terminals using one TELUS high speed Internet for Business connection.⁵

TELUS offers all these business-class features at a competitive price. Our flat monthly rate and contracted options ensures no billing surprises. TELUS high speed Internet service for business is also available as part of the Business One® Bundle.

TELUS knows the Internet. We are one of the largest Internet Service Providers in Canada with more than 400,000 clients. As a Tier 1 Canadian Internet Transit Provider, TELUS is the Internet Service Provider to many of Canada's other Internet Service Providers.

And we're much more than an Internet Service Provider. TELUS is the trusted telecommunications and IT partner of choice for Canadian businesses. We can help you find the solution that meets your needs – Internet, data, wireless and voice. Our experience and expertise, combined with our commitment to customer service, is your assurance of quality.

1. Domain Registrar fees for ownership rights to your own Domain name like www.yourbusiness.com are not included and will be billed to you separately by TELUS. Clients who transfer their existing domain name to TELUS will still be billed the yearly Domain Registrar fees by their original domain registrar. Domain names are restricted to availability. Allow up to 10 days for activation.
2. Minimum system requirements apply. Internet Security solutions will help customers prevent virus damage, hacker attacks, and data loss; however, no TELUS-known Internet Security solution is able to provide absolute protection.
3. TELUS Spam Control does not apply to TELUS Domain Hosting or TELUS Domain Essentials accounts.
4. Contract cancelled prior to term will result in a \$120 cancellation fee.
5. Talk to your debit/credit transaction provider about their IP POS solutions that can use TELUS High Speed Internet. They will supply you with any additional equipment, services, and support for your IP POS solution.
6. Prices do not include local access charges. Service may not be available in all areas.
7. For service plans with Static IP addresses, a computer or device will have a permanent IP address; however, it must be requested via DHCP. TELUS does not support hard coded IP addresses. Static IP addresses are not available in all areas.
