

Wireless Solutions. Backed by TELUS.

Secure Connect Bundle

TELUS Secure IP Anywhere securely extends IP Network connectivity to mobile devices, avoiding the public internet, while providing access to corporate applications, and increasing end-to-end management and control.

TELUS Mobile VPN Plus is specially optimized for mobile workers, keeping them securely connected to the applications they need, even in spotty network coverage areas.

TELUS Premium Services & Support, offered by a dedicated team of expert professionals, provides 24/7 comprehensive and personalized technical support above and beyond standard customer service for rapid issue resolution.

Today's business issues.

Mobile workforces are today's reality, and they need to work anywhere, anytime, securely. While workers are on the go, they face several challenges, including loss of productivity in the field, security concerns and rising costs. These challenges can result in employee frustration, financial loss and damage to the reputation of your business.

Take your desktop anywhere – securely.

TELUS now offers a way to take advantage of all the business benefits of mobility without the security concerns and productivity issues. By combining the features of TELUS Secure IP Anywhere, TELUS Mobile VPN Plus, and TELUS Premium Corporate Support, the Secure Connect Bundle eliminates worries over sending business-critical information through the Internet, the hassles of restarting applications, and the potential damage from Internet security breaches. This bundle provides:

- Increased Security
- Manageability
- Cost savings
- Simplicity
- Speed
- Productivity

Increased security. Security is improved by bypassing the public Internet and 'LAN-locking' mobile devices to your corporate network. TELUS Secure Connect Bundle creates a direct wireless to wireline private network from your mobile device to your MPLS-based corporate network.

Enhance manageability. Gain centralized end-to-end wireless device management and control. Internal security policies are extended to the field and you have the ability to view and report on all wireless devices remotely.

Reduce costs. Reduce costs associated with troubleshooting, Internet security breaches, and issue resolution. Cut down on trips back to the office to access information.

Simplify access. A single log-on allows for application persistence and no VPN fobs. Seamless mobility means users stay connected across different networks.

Greater speeds. Data compression creates wireless throughput speed improvements by up to 300%.

Enhance productivity. TELUS Secure Connect Bundle delivers continuous access to information. There's no need to re-authenticate or restart applications even while travelling in and out of coverage gaps.

Secure Connect Bundle

Widest range of features.

By combining the features of three existing TELUS solutions – Secure IP Anywhere, Mobile VPN Plus and Premium Corporate Support – Secure Connect Bundle provides the widest range of features and delivers unparalleled benefits.

Versatile solution for many sectors.

TELUS Secure Connect Bundle is ideal for any enterprise with mobile workers, including businesses and organizations in:

- Public safety
- Financial sector
- Natural resources
- Health care
- Education
