TELUS iDOC Lite

high performance video conferencing
solutions for telehealth

The TELUS iDOC® – interactive Doctor On Call – brings standard definition video conferencing to an affordable platform for telehealth. The equipment is housed in a highly mobile and lightweight platform designed to be used at the point of care. The cart supports any line of set top codecs. It is the ideal platform for clinical environments, continuing medical education (CME), remote healthcare training, teleconsultation, remote multi-hospital clinical and administrative meetings as well as remote mentoring.
