TELUS iDOC MD series

high performance video conferencing solutions for telehealth

The TELUS iDOC® – interactive Doctor On Call – brings standard definition video conferencing to telehealth. The equipment is housed on a solid tabletop platform designed to be used at the point of care. The MD – Medical Doctor – series supports a TELUS high performance codec. It is the ideal platform for clinical environments, continuing medical education (CME), remote healthcare training, teleconsultation, remote multi-hospital clinical and administrative meetings as well as remote mentoring.
